DETAILED ACTION

Election/Restriction

1. Applicant's election with traverse of claims 1-2 in Paper No. 7 is acknowledged. The traversal is on the ground(s) that although the applicants maintain that the claims are patentably distinct, the claims are sufficiently related so as to be in a single application. This is not found persuasive because there are different distinct inventions claimed.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Niwa et al. [US 5,063,098].

Niwa et al. discloses an electrical steel sheet [1] including at least one viscoelastic layer of 0.3mm or more in thickness disposed on at least one of the surfaces of the steel sheet, wherein the viscoelastic layer having the loss factor have one or more peaks at temperatures within the range from 20 to 200 degrees Celsius.
